## Helpful Tips!

The paper burnisher or creaser can be found in many arts and craft stores. I also sell them in my online shop at [www.anniehowes.com](http://www.anniehowes.com)

**Glamour Dots** are 3-dimensional clear epoxy stickers. They have an adhesive on one side.

First, punch your paper in to a 1" circle (or the size of your Glamour Dots). Carefully position the Glamour Dot over the paper you're using. Use firm pressure to press the paper to the dot. I recommend using a burnishing tool, or paper creaser to give you the technique required to remove all the air pockets. The technique is to push the paper to the adhesive rather than try to drag the air to remove it.

Once the Glamour Dot is attached to the paper, apply a Glamour Sticky to the back. Peel off one protective layer from the Glamour Sticky and press to the paper. Peel off the second protective layer and press the finished piece into the pendant tray, drawer pull, bottle cap, or whichever item you are working with. Once securely in place, your project is complete and ready to wear.

I hope you enjoy making your project! For more information and kits, please visit [www.anniehowes.com](http://www.anniehowes.com).
